Summary

I'm an applications developer with an eye for originality a flair for translating concepts to innovative results.

Originally a web developer (html, php, mysql...), now I also create applications in objective-C, iOS and Mac OS X Apps. I'm always searching for new concepts to incorporate cutting edge design.

I recently co-founded RavenCo, a project which launches a re-invention of browsers.

Currently I'm in an internship at Sage while going at ECTEI Paris, in order to graduate in Computer Science.

Professional Experience

September 2011- present : Mobile Technologies developer
Desktop class applications available for mobile. The goal is to cover most of Sage 1000 desktop version applications functionalities and translate them to the mobile experience. Sole charge of user interfaces design and of application development.

March 2011-Now: Co-Founder of [RavenCo](#), Lead developer
[Raven](#) is a browser (at the moment only for Mac OS X) with some neat features, we made something called "site-specific browsing". Our goal is to provide a new way to browse the web. Currently, we have around 100 000 users and 250 000 applications downloads. The startup was co-founded between Kevin Milden (designer, California), and myself.

- Creating an OSX application from 0 to the release, today used by more than 100 000 users.
- Thinking and deciding of every technological aspects of the project.
- Design and implementation of an internal applications/plugin system with 1 click install from web.
- Debugging and optimization at every level. (Memory, CPU efficiency, Database, animations...).

September 2009-2011: Junior Project Manager
OurSagePlace.com, a collaborative bilingual platform aimed at internal and external collaborators and partners. I was in charge of specific developments, support and training users. OurSagePlace is based on Liferay technologies, written in Java.

- Specifications for new functionalities
- Managements of a subcontractor development team based in India.
- Webmaster and administrator.

Education

2009 - 2011 HND In Applications development at ITIC, Paris
2006 - 2009 Baccalaureat Computer Management

Skills

Programming languages

Php, HTML, CSS, MySQL, Javascript with JQuery, Objective-C , C, C++, JAVA
Design patterns, algorithm optimization, compilation, code analysis.

Operating System

Mac OSX, Linux (Redhat, Ubuntu), WIndows XP, Vista, Seven

Software

Microsoft Office Suite, Filezilla, VMWare, Photoshop, DreamWeaver..., iWork, iLife, Coda, xCode...

Language

French: Mother tongue.
English: Working knowledge.
